

Help Grow the Reach of the National Trauma Campaign

The National Trauma Campaign relies on the engagement and voices of constituents. Our mission is to educate members of Congress on the science of trauma and resilience, and engage congressional offices to support trauma-informed policies and provisions.

You can help expand the reach of the Campaign by sharing information with your networks and encouraging individuals and organizations to join. It's free and all-volunteer led.

Use these tools to support your outreach. Contact the National Trauma Campaign Core Team at info@traumacampaign.org if we can answer questions or support your efforts.
